Vinyl

With their ability to be posted just about everywhere, custom stickers can market your brand in a huge variety of ways and places.

Canvas

For indoor artistic feel images, This smooth white poly/cotton canvas produces excellent paintings at a lower cost.

Glossy paper and glossy film

These high gloss materials are great for posters, prints, indoor signs and roll up. A gloss or matt finish can be applied for indoor use or short term outdoor use.

Backlight

Great for light boxes, menu boards, gives extremely vibrant colors. For indoor use or short term outdoor use

Stain

This is the best solution for printing flags. Satin is a polyester textile that has a silky look. Light height. Can be for indoor and outdoor flags in events and exhibitions.

OUTDOOR

Banner (Matt-Glossy-Blockout-Reflective)

Banner advertising is consistently one of the most popular methods of marketing. Its proven effectiveness and low cost of production make it a highly attractive option for businesses.

See-through

Made with small holes throughout it so you can see through the material. Light plays an important role in how this material looks when applied.

Flex

Translucent flexible sign face material. Ideal for backlit billboards and light boxes, exhibits, and trade show displays. Available for indoor and outdoor use.

Vinyl

Adheres to most surfaces, it can be adhered to exhibit boards, glass, plastic, metals and painted surfaces. Great for vehicle signage.

Mesh

Open-weave flexible material typically used for the production of building wraps, trade show dangles, indoor and outdoor signage.

Digital (Develop Machine)

Get print quality that rivals traditional offset printing! From a small static print job to personalized direct mail, it all can be done cost consciously with digital printing. you can print easily Business Cards, Invitations & Postcards, Flyers, Folded Leaflets, Letterheads, Posters Booklet and Brochure.

Kind of paper: Couche – Crystal- Febriano- Opalin- Sticker

Cutting Laser (Sharp Machine)

Laser cutting is a technology that uses laser to cut materials, and is typically used for industrial manufacturing applications. Industrial laser cutters are used to cut flat-sheet material as well as structural and piping materials.

We can laser to 130*90 cm till thickness 5 cm.

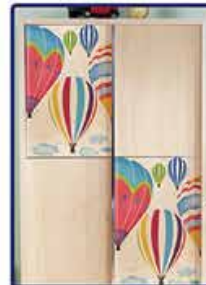

FLATBED

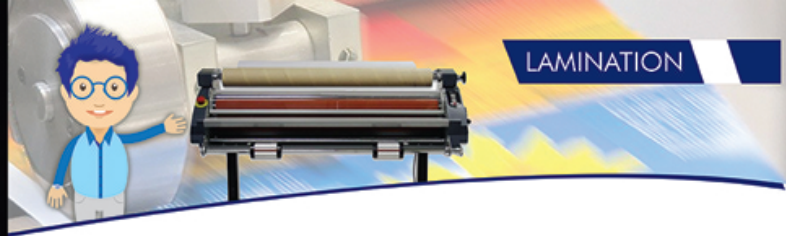

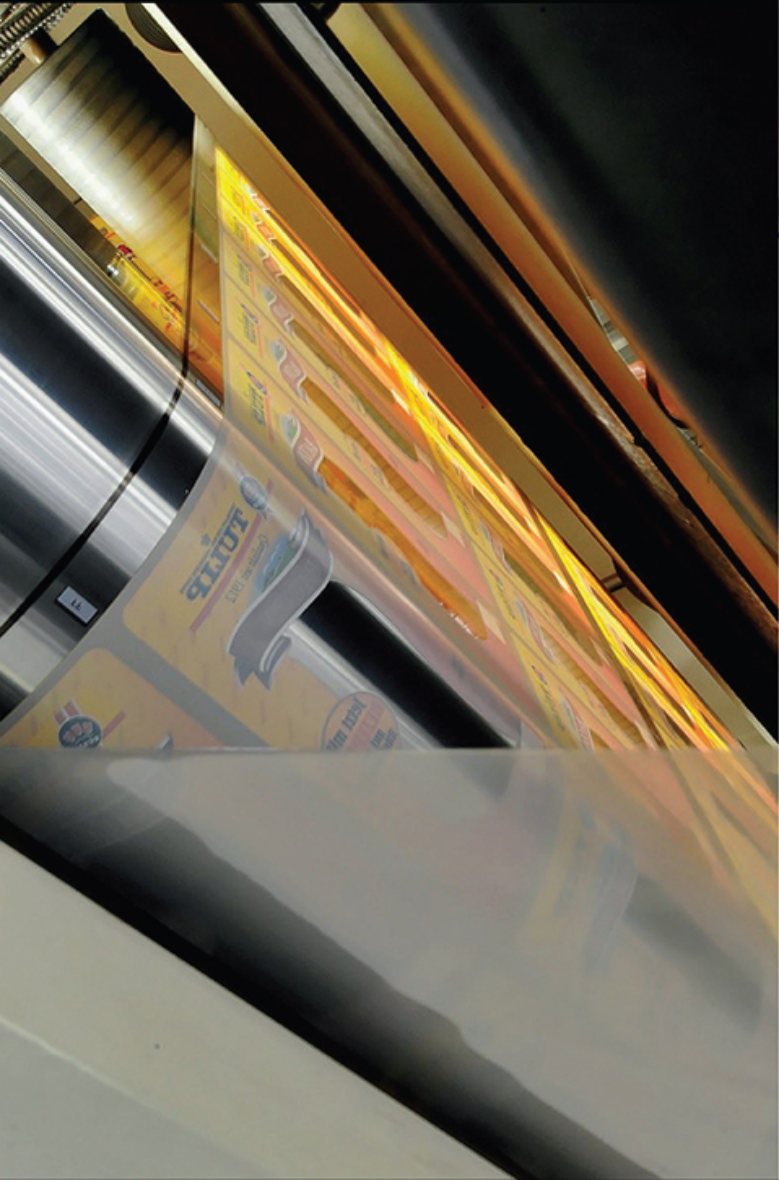

Flatbed Printing

Flatbed printing is the term used for digital printers that image directly to a large variety of substrates using UV curable ink. Materials are placed on a vacuum bed and imaged from above. UV curable ink is very versatile and cures by a chemical process when exposed to UV light.

Custom printing: Glass, Metal, Custom wood, Ceramic, Alecobond, Fabric, Pen, Flash memory, Coaster, Leather, CD, P.V.C Card, Mouse pad.

Lamination

Prints can be laminated using matt or glossy lamination. Lamination gives extra value for the prints. It also enriches the material and gives extra thickness to the media. In addition, it gives extra lifetime for the colors.

Custom printing: Matt - Glossy - Ground - 3D

Mug-Plates

Print your customized designs onto mugs/plates with direct print sublimation ink.

Custom printing: - Mug Regular, Mug Conical, Mug Magic
- Plate

Printing on Garment

Print your customized designs onto t-shirt, cap, sleeve, scarf, or even on socks with full color, pigment ink.

Soon..
